
SUMMARY:

- Full Stack Developer familiar with wide range of programming utilities and languages. Knowledgeable of backend and frontend development requirements. Handles any part of process with ease. Collaborative team player with excellent technical abilities offering 9+ years of related experience.
- Having 6 years of experience in **PHP** and 3.8 years of experience in **Python, C#, Node JS, Angular, Angular JS, MVC, AJAX, Web API, Web Service, WCF, MySQL, PostgreSQL and SQL SERVER 2008 & 2014** and also over 9+ years of professional experience in all phases of Software Development Life Cycle (SDLC) with a focus on web based client-server (multi-tier architecture) applications, software design, analysis, development, and implementation of high-performance web and cross-platform mobile applications.
- Working knowledge of agile methodology and best practices. Creative, resourceful, and flexible. Able to adapt to changing priorities and maintain a positive attitude and strong work ethic. Strong knowledge of product design and development.
- Experience developing web applications using **PHP, Python, C#, Magento 1, Magento 2, Node.JS, Angular JS, Angular, React Js, HTML5, SVG, CSS3, DHTML, DOM, JavaScript, HTML4, JQuery, Joomla, WordPress, Drupal, JSON, UML, XML, XSL/XSLT and AJAX.**
- Experience developing and deploying web applications with MVC frameworks: **Laravel, CodeIgniter, Zend, Express and CakePHP.**
- Proficient in Object-Oriented Design (OOD), data structures, problem solving, complexity analysis & debugging and good understanding of various design patterns.
- Familiar with Service Oriented Architecture (**SOA**) with experience developing and consuming Web Services using **REST, SOAP, XML, WSDL** .
- Experience developing application based on **Magento 1, Magento 2, Joomla, WordPress** and Content Management Systems (**CMS**)
- Experience implementing third-party connections via **API** .
- Experience using version control systems such as **Bit bucket, Gitlab, Assembla and Tortoise Version Control** .
- Experience using package managers such as Composer and NPM.
- Involved in entire lifecycle of the projects including Design, Development, and Deployment, Testing and Implementation and support.
- Hands on experience programming with **PHP, Python, C#, and Typescript** technologies.
- Experience with source code management and bug tracking systems.
- Expert of writing shell scripting for **Linux/Unix**.

SKILLS

Operating Systems:	Windows and Ubuntu
Languages:	PHP, Python, C#, Node JS, Angular, Angular JS, MVC, AJAX, Web API, Web Service, WCF,
Web Technologies:	HTML5, CSS3, SASS, JavaScript, Angular, React, Typescript, React.JS, GraphQL, JSON
JavaScript Framework:	Angular, React, and JQuery Library
Databases:	Oracle, MySQL, SQL Server, PostgreSQL
Development Tools:	Pycharm, Visual Studio Code, Jupyter Notebook, Atom, PhpStorm and Photoshop
Other Technologies:	Linux shell scripting
Web Servers:	Apache 1.3, Apache 2, Tomcat
Software Best Practices	
Web Analytics Tools	
Critical Thinking	

Education

- 2013- MCA, Computer Application, Anna University (First Class)
- 2010- B.Sc., Computer Science, Periyar University (First Class)

Certification Details

- 2011- OCP (Java) at NIIT, Coimbatore
- 2008- PGP at Universe Technologies, Salem
- 2007- DCA at CSC, Salem (A+ Grade)

PROFESSIONAL EXPERIENCE

Pon Pure Logistics Pvt. Ltd, Chennai

June 2020 – Present

ponpurelogistics.com

Role: Assistant Manager (Team Lead)

Responsibility:

- Designing web forms using Angular, Angular JS and ASP.NET Web API for markets on boarding and trade web modules.
- Contributed greatly to increases in code quality and productivity through my leadership and guidance in areas such as Test/ Behaviour Driven Development (TDD), Refactoring, and Agile Estimation and Planning
- Involved in coding, development and deployment.
- Performs technical root cause analysis and outlines corrective action for given problems.
- Designing web forms using ASP.NET MVC and C# for reports, transport & shares web module.
- Worked on end-to-end development and base setup.
- Mentored developers for web application to understand the requirement and implement the solutions promptly with discernment.
- Oversee multiple projects across all phases of development
- Project Management in Agile methodology
- Monitor workflow and make timeline adjustments
- Work as a part of interdisciplinary team achieve project milestones
- Collaborate with development teams to plan release
- Managed stakeholder expectations, regularly communicating project progress with weekly and monthly reports, risks, and issues, and ensuring alignment with organizational goals and objectives.
- Provide **technical support** and trouble-shooting to clients and end users
- Use source version control tool **GIT** for code base management.
- Developed several importer tools implementing business logic to import data into the database.
- Upgraded legacy transactional email system by implementing **SMTP service** , significantly improving email deliverability.
- Fixing bugs from existing websites and implemented enhancements that significantly improved web functionality and speed.
- Worked with clients and team members to determine creative options that best met the project requirements and communications goals.

Tools and Technology: PHP, Python, C#, Node JS, Angular, Angular JS, MVC, AJAX, Web API, Web Service, WCF, MySQL, PostgreSQL and SQL SERVER 2008 & 2014.

DCKAP Technologies, Chennai

June 2019 – May 2020

dckap.com

Role: Senior Software Developer

Responsibility:

- Build websites and modules on Magento platform and multi-sites.
- Develop and integrate intelligent features into Visual-Planner aimed at maximizing the software's effectiveness and usefulness.
- Fine-tune and rebuild parts of **User Interface (UI)** to achieve high quality user experience.
- Work closely with other team members to coordinate software development and determine project scope and limitations.
- Designed, built, tested and implemented stand-alone modules for **Magento 2**, including payment and shipping modules.
- Customized **Magento's** inherent features based on client needs.
- Strong experience with **Magento Commerce** (creating modules, extending out-of-the-box functionality, layout creation and theming)
- Provide **technical support** and trouble-shooting to clients and end users
- Develop and maintain **RESTful web services** in **PHP** which support **JSON** and **XML** and implemented Service Oriented Architecture (**SOA**) internally to streamline the communication between frontend and backend.
- Use source version control tool **GIT** for code base management.
- Developed several importer tools implementing business logic to import data into the database.
- Upgraded legacy transactional email system by implementing **SendGrid/Mailgun/Mandrill SMTP service**, significantly improving email deliverability.
- Migration from Magento 1.X to Magento 2.X
- Fixing bugs from existing websites and implemented enhancements that significantly improved web functionality and speed.
- Worked with clients and team members to determine creative options that best met the project requirements and communications goals.

Tools and Technology: PHP 4/5/7, RESTful, Magento, Magento 2, JSON, XML, LAMP, ecommerce, SOA, Python, HTML5, SVG, SEO, JPEG, PNG, PDF, JavaScript, GIT, MySQL, Zend, SQL Server 2008, SSIS, MSSQL, MVC, Bootstrap, jQuery, jQueryUI

DevelopScripts LLC, Chennai

Dec 2015 – June 2019

developscripts.com

Role: Senior Software Developer

Responsibility:

- As the primary responsibility designed, developed and supported websites and products.
- Identification and recommendation of process improvements and evaluation of products and solutions, which may enhance the project's efficiency and productivity.
- Addressing security and performance issues.
- Worked on ecommerce projects for the USA clients
- Designed, developed and implemented programming applications using PHP
- Developed my own framework and used Zend Debugger to determine what is going on within the code.
- Working on UI development using **PHP, Node.JS, Angular JS, Angular, Magento 1/2**.

- Using and writing **REST services** to communicate with the database.
- Writing **JavaScript code** to make UI more interactive.
- Using **SQLServer, MYSQL and XML** as databases.
- Working with parsing and updating **XML** data in **REST** communication.
- Working with **error and exception handling in web** communication.
- Used **JQuery** tabs to make user interface more interactive.
- Extensively used **JavaScript, CSS and HTML** for front end development and validations.
Developed back-end using **PHP scripting and MySQL**.
- Providing cost effective and efficient solutions to requirements.
- Suggest and implement new and innovative features useful for success of project.

Tools and Technology: PHP5, Node.JS, Angular JS, Angular, Magento 1/2 , Drupal, MySQL, Netbeans , AJAX, JQuery, OOPS based API

Saswins Consultants, Bangalore

April 2013 – Nov 2015

Role: Developer

Responsibility:

- Designed, developed and implemented programming applications using PHP
- Worked on Content management based websites and E-commerce websites
- Worked with team size ranging from 4-5 members
